

- 11) The City of Vaughan should also seek means by which the general public might be made more knowledgeable of the wide range of archaeological resources present within the City, and of their significance as part of the City's cultural heritage (bearing in mind the necessity that the locations of certain extant sites remain confidential. A heightened public awareness of the importance and fragility of archaeological resources can serve as an additional and effective means of protecting those resources. The City should, therefore, support any programs and endeavours related to involving the public in the investigation of the City's archaeological record.
