

Old Maple area Road, watermain and sewer improvements

MARCH 2024 | NEWSLETTER #6

Dear resident,

Infrastructure improvements in the Old Maple area are nearing completion. The project has included watermain replacements, drainage improvements, storm sewer enhancements and road reconstruction.

Project update and timeline

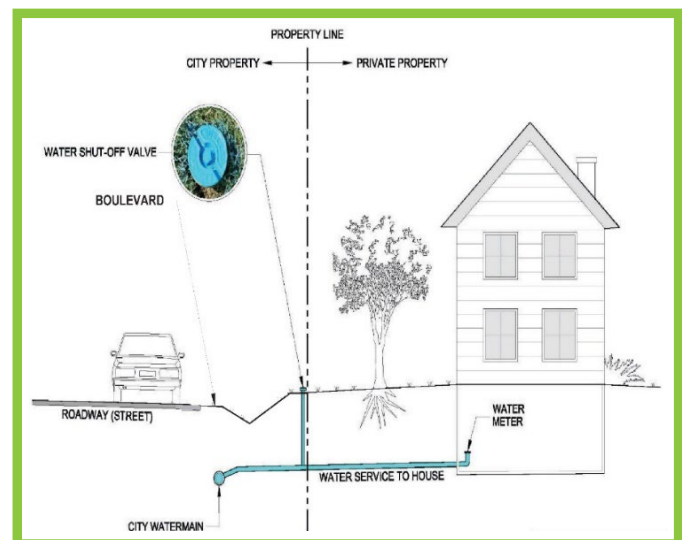

The remaining work, which includes regrading and reinstalling culverts and ditches, line painting, applying the final coat of asphalt, sodding and final road restoration, is scheduled to begin in early April 2024 and be completed by the end of summer 2024.

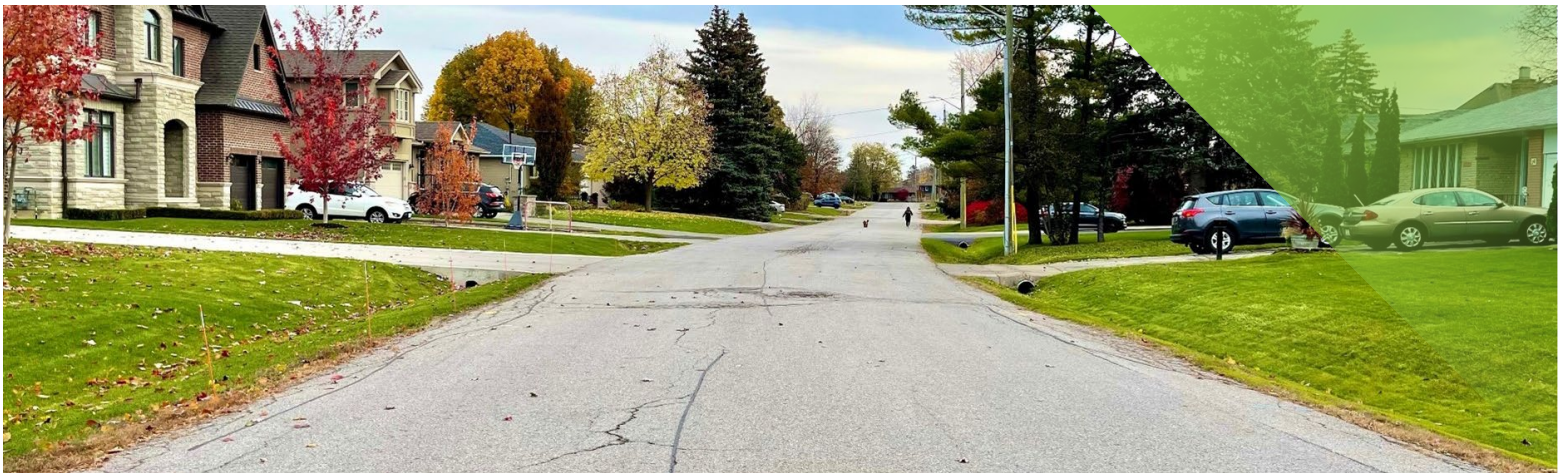

Reminders

As construction continues, please be mindful of:

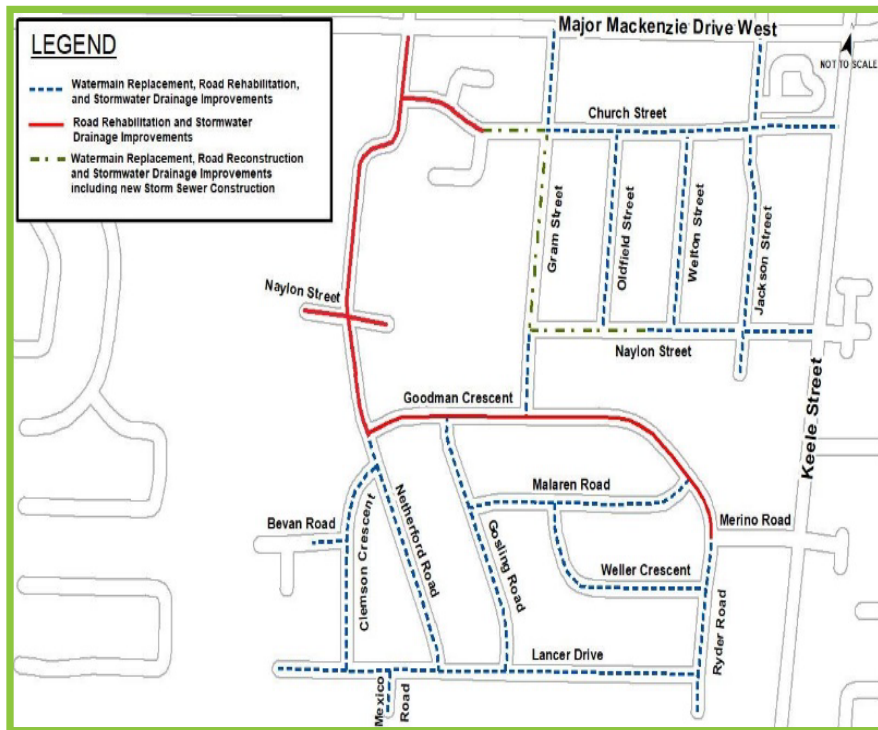

- temporary parking restrictions in active construction zones, marked with temporary no-parking signs.
- road closures to safely complete construction – advanced notice will continue to be provided to impacted residents and businesses.
- temporarily restricted access to residential and commercial driveways.

If your property is adjacent to the roadway, consider removing or relocating any landscaping objects and features that encroach into the City boulevard, as per the Encroachment By-law 034-2017. Privately owned underground systems within City-owned boulevards may be impacted during construction – any damage will not be considered at fault by the contractor if within City boulevard property limits.

Project area

Consultant: Morrison Hershfield Limited
Contractor: North Rock Group Ltd.
