

#### 4.1 Stockpiles

Stockpiles shall be implemented in accordance with the TRCA's Erosion and Sediment Control Guideline for Urban Construction and shall be explicitly included in any Erosion and Sediment Control Plans (See 4.2).

Topsoil or other earth material stockpiles shall not be located on City property, including park blocks to be conveyed to the City. Stockpiles on future school blocks are only permitted subject to establishing satisfactory arrangements with the relevant school board. Stockpiles shall be located away from any existing residential development to the extent possible.

Stockpiled topsoil shall be tested for N, P, K, Mg, soluble salt content, organic matter and pH value etc. and shall be suitable for the proposed use as certified by a Landscape Architect.

Management of excess soil shall ensure compliance with O. Reg. 406/19. The City may require the submission of applicable information and studies pertaining to the movement, generation, and/or placement of excess soil as part of City permits and/or development approval.
